## *Birding in the Klaserie*

With sole use of the lodge for the duration of your stay, you will have the freedom and flexibility to walk or game drive at a time that suits your group and increases your chances to see as many birds species as possible. Maximise your exposure by visiting our large variety of habitats, from the stunning Klaserie River to acacia thornveld and mopane woodland.

Depending on the season, some exciting sightings you could expect throughout your stay include various herons, storks, kingfishers, barbets, cuckoos, warblers and much more besides. Fairly regular special sightings include the White-headed vulture, Greater-painted snipe, Temmincks courser, Southern ground hornbill, Verreaux's eagle-owl or one of the many other raptor species that call the Klaserie home.

Although summer is highly recommended for the plethora of migrants, the cool winter climate and open scrub also make for excellent bird and game viewing. Certain keen-eyed visitors have even been extremely lucky to spot some true rarities for the area. These include the Violet-eared waxbill, Marico flycatcher, Secretary bird, White-throated robin-chat, Grey-headed kingfisher, Eurasian golden oriole, Penant-winged nightjar and even a Swallow-tailed bee-eater. As always in birding, you never know what you might get on the day - but that is why it's so exciting!

With a specialist and locally recognised Birding guide on hand to teach you everything from visual and call ID to fascinating bird behaviour and where to find specific species, you will truly be in birding heaven.
